

Home Theater Designs/Concepts- CLASSIC

Eskay's Acoustics teams can execute any concept from the designs below or any design you may have liked from your research*.

Ideal Acoustical Profiles: For Full Acoustics effect, (1) is optimal and (2) is minimal

- (1) Four Layer treatment:** Hardwood framing/Synthetic wool infilling/covering with MR grade plywood/12mm PU Foam, Gripper System with Acoustical Profiles & Fabric covering. Acoustical Ceiling and Carpet.
- (2) Two Layer treatment:** Hardwood framing/12mm PU Foam, Gripper System with Acoustical Profiles & Fabric covering. Acoustical Ceiling and Carpet.

Prices are quoted on the basis of the design selected, and the rate can vary depending on the fabric/carpet samples chosen. Lighting and electrical fittings inside the Home theater is taken care of by us.

We will design the full Home theater room except AC/Recliners.

* Please note some of these designs can only be executed with 4-Layer treatment due to multiple layering

* The images shown are for illustration *purposes only* and may not be an exact *representation* of the output *Some designs are inspired by works abroad or from designer/trade publications & media.
