Eskay's Acoustics teams can execute any concept from the designs below or any design you may have liked from your research.

Ideal Acoustical Profiles: For Full Acoustics effect, (1) is optimal and (2) is minimal

(1) Four Layer treatment: Hardwood framing/Synthetic wool infilling/covering with MR grade plywood/12mm PU Foam, Gripper System with Acoustical Profiles & Fabric covering. Acoustical Ceiling and Carpet.

(2) Two Layer treatment: Hardwood framing/12mm PU Foam, Gripper System with Acoustical Profiles & Fabric covering. Acoustical Ceiling and Carpet.

Prices are quoted on the basis of the design selected, and the rate can vary depending on the fabric/carpet samples chosen. Lighting and electrical fittings inside the Home theater is taken care of by us.

We will design the full Home theater room except AC/Recliners.
